### Skills:

Python, R, MySQL, C++, C#(.NET, Unity),  
CSS, Javascript, Matlab

### Projects

<https://cruetto.github.io/PortfolioWebsite/>

### Education :

Bachelor: Vilniustech, third year of „AI systems“

Courses: Programming at NKKM

### Languages:

English, Lithuanian, Russian

---

### About Me:

I'm a programmer who loves learning and wants to get better in Data Science. I put all my effort into my work and make sure to finish what I start. I enjoy solving problems. Currently, I'm a third-year AI systems student at VilniusTech. I also completed a 3-year Programming course at NKKM where I gained basic knowledge of C++ and created programs using Visual Studio in C# (.NET), SQL. At university I learned math subjects such as Probability Theory, Statistics, analyzed data with R (Programming Language), studied Python and made bots for browser automatisation and manipulated data structures with MySQL. Created my own portfolio website using CSS, and JavaScript, where you can find descriptions of my projects. I am easy-going person and I can make friends with anyone. Hard work is not a problem for me and I am willing to work until I sweat my last drop to get job done.
