Projects

https://cruetto.github.io/PortfolioWebsite/

Education :

Banchelor: Vilniustech (second course of „AI systems")

Courses: Proggramming at NKKM

Middle school: „Vilniaus „Juventos" gimnazija

About Me:

I'm a programmer who loves learning and wants to get better in IT field. I put all my effort into my work and make sure to finish what I start. I'm seeking a part-time job as a Software Engineer to learn and improve my skills. I enjoy solving problems. Currently, I'm a second-year AI systems student at VilniusTech. I also completed a 3-year Programming course at NKKM. I have basic knowledge of C++ and created programs using Visual Studio in C# (.NET), MySQL, and VisualBasic. I've also made games with Unity and Gamemaker. In my free time, I build Android apps using Glide, work on projects with Arduino, and created my own portfolio website using HTML, CSS, and JavaScript, where you can find descriptions of my project.
